WHO WE ARE

Combat Robotics at Cornell is a student-run engineering team focused on creating a unique outlet for innovation, engineering, and creativity. As the first robotics club of its kind at Cornell, we aim to collaborate and design 12-pound robots using advanced mechanical design skills and an emphasis on novel solutions for several competitions, such as the Norwalk Havoc Robot League, throughout the year.

Since October 2019, the team has grown to over 30 dedicated members specializing in various disciplines, such as mechanical engineering, computer science, and business, and design. The multidisciplinary skills of the team facilitate innovation and creativity, greatly contributing to victory in battle.
